

EZiSYSTEM User Training

"A very informative session conducted by someone who has in depth knowledge of the subject"

H. Reese, Natta Building Co

Intended for all users of cable locators. The course delivers a comprehensive insight to the use of cable locators, providing theoretical and practical use of the EZiSYSTEM.

Theoretical aspects include:

- EZiSYSTEM range
- Legislation
- Safe System of Work
- Theory of operation
- Use of locating devices
- Locating methods
- EZiTEX signal transmitter
- EZiROD utility tracer
- Accessories

Duration: Approx 4 hours

Location: Conducted at Cable Detection's offices in Stoke-on-Trent. For larger groups the course can be held at your site. Ask for more details.

Practical aspects include:

- Using an EZiCAT in power mode
- Using an EZiCAT in radio mode
- Using an EZiCAT to conduct a sweep search
- Using an EZiTEX in induction mode
- Using the EZiTEX in connection mode
- Depth estimation
